## MPS

### MULTIPHASE SAMPLER

Fitted with cyclonic insert and gas demister for **clean fluid separation** and **improved reliability** of the sample analysis.

#### ONSITE ANALYSIS

The MPS allows fast and frequent sampling of a multiphase well effluent in order **to acquire fluid characteristics** such as Specific Gravity, Salinity and rough BS&W.

#### DESIGN DATA

From 600 to 2000 PSI  
H2S/CO2 service

#### CONFIGURATION

Supplied with pressure regulator, valves, level and pressure gauges. Can be packaged with inlet and outlet Quick Connect flexible hoses and analysis instruments. Basic assembly as an accessory for Multi-Phase Flowmeter or skid mounted version for well management operations.
